

How to start the eGalaxHidDaemon Automatically

Date: 2023/08/30

This document describes how to start the eGalaxHidDaemon automatically on the macOS. The following steps show you how to add a start item in your account. After doing the settings, the eGalaxHidDaemon can be executed automatically when you log in or system boot.

Step 1:

Download the eGalaxHidDaemon_2.x.x zip from the EETI website.

https://www.eeti.com/drivers_Mac.html

Step 2:

Double-Click to decompress the eGalaxHidDaemon_2.x.x zip file in your macOS. You can get a folder named eGalaxHidDaemon_2.x.x

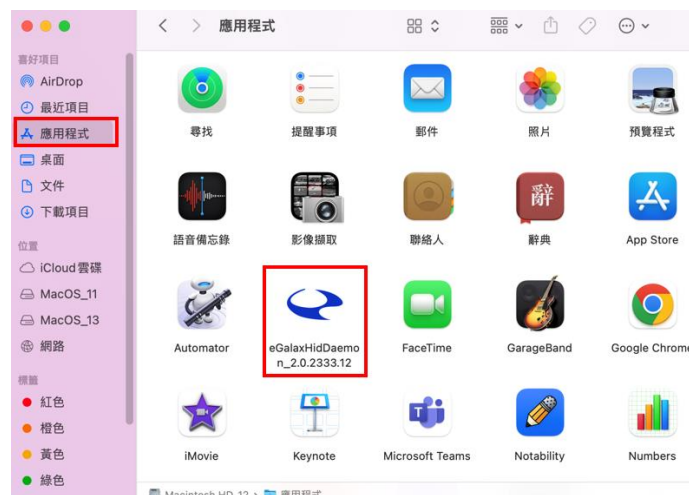

Step 3:

Select the eGalaxHidDaemon file which matches your OS version.

Step 4:

Copy and Paste eGalaxHidDaemon file to Applications folder.

Step 5:

Click the [System Preferences](#) item from the Apple menu and select [Users & Groups](#)

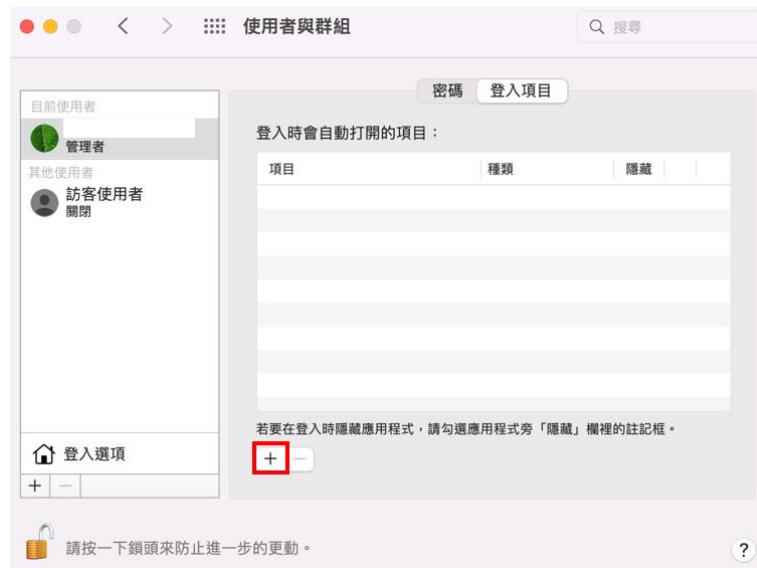

Step 6:

Click a username which you are using and select the [Login Items](#) tab.

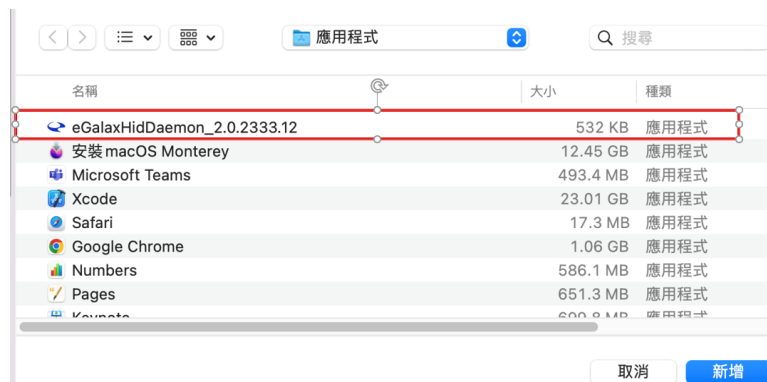

Step 7:

Click the **+** (plus) button and the Finder window will open.

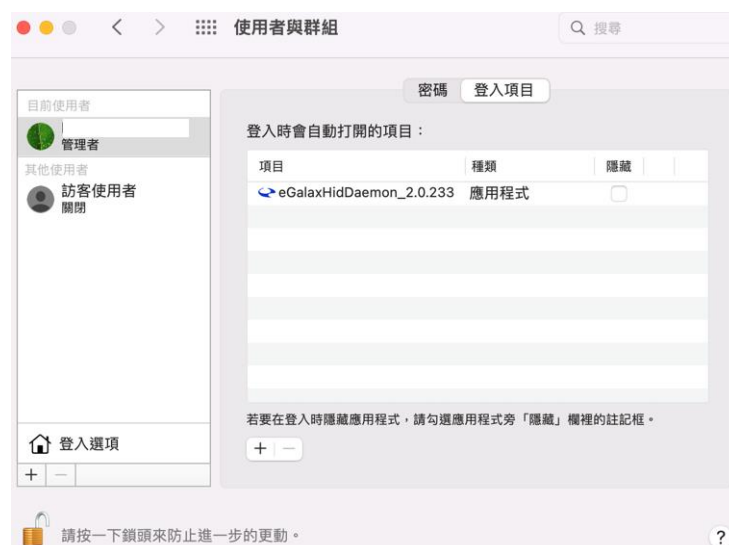

Step 8:

Select the eGalaxHidDaemon in **Applications** folder. The application can be executed automatically after you log in.

Step 9:

The new item **eGalaxHidDaemon** has been added.

Step 10:

Reboot the MacOS or re-login your account.

Step 11:

After restarting or re-login, please execute the [Activity Monitor](#) in the Applications\Utilities.

Step 12:

Check the [eGalaxHidDaemon](#) in the executing Process
